DAVID DOCKTERMAN, Ed.D.

Adjunct Lecturer in Education, Harvard Graduate School of Education; Chief Architect, Learning Sciences, Scholastic Education

Dr. David Dockterman is chief architect, learning sciences at Scholastic Education where he provides guidance on turning research into practice and programs. He was one of the founders of Tom Snyder Productions, a leading educational software developer and publisher that was acquired by Scholastic in 2001. Over his 25-plus years in the industry, Dockterman has led the development of scores of award-winning instructional technology programs, including *Decisions, Decisions*; *Thinking Reader*; *FASTT Math*; and *TimeLiner*. Most recently he served as a key adviser for the creation of Scholastic's *MATH 180*. Dockterman authored the books *Great Teaching in the One Computer Classroom* and *Weaving Technology into Your Teaching*. He also cocreated and cowrote *Science Court*, the highly acclaimed animated TV show that ran for three years on ABC's Saturday Morning. Before joining Tom Snyder Productions, Dockterman taught high school social studies. He has dedicated himself to supporting classroom teaching and the successful integration of technology into schools. "Dock" enjoys family time and community volunteer work.

KAREN BURKE, Ph.D.

Director of Academic Planning,
Scholastic Achievement Partners

Dr. Karen Burke believes that there are three ways to increase student achievement at scale: by increasing the level of knowledge and skill the teacher brings to the instruction process, by increasing the level and complexity of the content that students are asked to learn, and by changing the role of the student in the instructional practice from passive to active. These core beliefs help her to design research-based solutions for school districts that guarantee accuracy and success.

Dr. Burke has served students for more than thirty years as a classroom teacher, principal, Title I director, NCLB coordinator, and curriculum director and an assistant superintendent of schools in Maine. Additionally, she has served as a distinguished educator for the Maine State Department of Education. She is currently an adjunct professor at Nova Southeastern University in Florida, working with graduate students.

Dr. Burke has a bachelor's degree in elementary education and teacher of Spanish. She earned two master's degrees from the University of Southern Maine, one with a concentration in reading and the other with a concentration in mathematics. She holds a Certificate of Advanced Study for Administration from the University of Maine in Orono and earned a doctorate from Nova Southeastern University. Dr. Burke has received the Maine ASCD Educational Leader of the Year Award, Maine's Literacy Award, and the Nova Southeastern Noreen Webber Child and Youth Studies Honor Award.
